

You're invited.

Come see Southern Lehigh's Project BLUE (*Bridging Learning through a Ubiquitous Learning Environment*) one-to-one MacBook program in action.

Join us for a visit to Southern Lehigh School District to see a one-to-one program that engages all students. Learn how the technology infrastructure supports innovation in teaching and learning. Hear from members of the school community and visit classrooms in grades 7–12 to discover the possibilities that mobile learning provides. Here's what you can expect during your visit:

- Hear from the Southern Lehigh leadership team regarding their vision for enhancing student learning and achievement with technology.
- Hear from administrators about the climate shift from teacher-centered to active student engagement.
- Interact with teacher and student panels as they address learning with Mac.
- Visit classrooms and interact with high school or middle school teachers and students during panel discussions.
- Learn about Southern Lehigh's model of ongoing professional development.
